Working Experience

2020 (3 months) National Observatory of Athens - *Intern Data engineer*
I developed a database for storing satellite imagery/geospatial data. The process involved setting up a vm, deploying the database, write trivial machine learning scripts to test out the data.

Education

2016 - 2021 Harokopio University, Athens - *Undergraduate Student*
Currently writing my thesis.

2019 (Erasmus) AGH University, Poland - *Erasmus Student*
I did a semester within the erasmus program.

Diplomas

- ECDL (European Computer Driving License)
- C2 (Michigan Proficiency in English)

Software

hexi is a command line hex editor written in the c programming language without having external dependencies + vim bindings.

fengari is a 2d platformer game regarding planets. currently being made with love2d and the lua programming language.
